

## ***Our Line Card - MORE THAN JUST A REP COMPANY***

*We offer innovative solutions from principals with enabling technologies that will change your company  
A woman owned small business*

### **LogicAll Solutions, LLC**

[www.logicallsolutions.net](http://www.logicallsolutions.net)

Provides innovative "global-ready" GPS & mapping monitoring systems utilized by the mining industry and niche industrial sectors. Products include boom monitoring, vehicle tracking, geo-fencing, compliance data logging and production reports in support of drag-line cranes, dredges, drill Rigs, blast rigs and off-road heavy equipment vehicles. If it has a boom, it can be monitored.

Operational cost savings, production increases, safety monitoring and permitting compliance are achievable. Engineering services are available to implement any site specific application and the demands required by severe environments.

### **POVservices**

[www.POVservices.com](http://www.POVservices.com)

A uniquely specialized marketing firm perfect for start-up companies and new product launch activities. POVservices will help your company get the visibility you need without killing your marketing budget.

Special attention is placed on developing the sales tools and collateral pieces that customers notice. A simple yet effective approach integrates creative collateral design, event planning and public relations activities. These capabilities will get your message out to the right audience and springboard sales and investor communications.

### **Addaption Technologies**

[www.addaption.com](http://www.addaption.com)

A high-end solutions-based website designer and marketing services company. Strategic planning, content structuring, website design, graphical implementation, custom web applications and search engine optimization is provided. Services include reliable website hosting and information security. Complex e-commerce "online store" applications requiring sophisticated shopping cart solutions are provided such as personalized displays, coupons & promotional codes, inventory processing, integrated shipping and order entry confirmations.

The partnership between masterful programmers combined with creative artists, innovative ideas and cutting-edge technologies will exceed your expectations. They are well suited to meet the challenges of today's market place and will establish your brand, promote your business and achieve your goals.

### **Dynamic Innovations, LLC**

[www.d-inno.com/client.html](http://www.d-inno.com/client.html)

Dynamic Innovations located in the Sarasota Florida area, is a full service engineering firm specializing in new product design and development. Complex projects are taken from concept through production. Services include project management, industrial design, mechanical engineering, electrical engineering, software engineering and prototyping. These design services as supplied to the OEM have included products such as tablet computer enclosures, laptop cases, PDAs, cell phones, kiosks, helmet mounted displays and militarized instrumentation. A family of uniquely featured high-end carbon-fiber brief cases exist known as CLAD Case.

Special attention is placed on innovative designs using Pro Engineer (ProE) that require increased functionality and compliance to complex specifications such as extreme shock & vibration and thermal management utilizing new high-performance materials such as carbon fiber. In-house capabilities include Fused Deposition Modeling (FDM), RTV molding and high-precision CNC machining.

## OUR COLLABORATIVE PRINCIPALS LIST (In Association with Southeast Technical Sales)

### **Nova Integration Solutions**

[www.novaintegration.com](http://www.novaintegration.com)

An advanced packaging company focused on backplanes (VME, VME64X, VXS, VPX, CompactPCI & VITA-xx), rugged chassis, extreme enclosures and rugged printers. An emphasis is placed on engineering services that produce custom and COTS styled chassis & packaging that operate in severe environments and utilize a complex AC/DC power supply and with a UPS (optional) in support of convection, conduction and liquid cooled ATR & LRU applications. The rugged printer portfolio features both monochrome and color laser and impact printers.

### **Memkor, Inc.**

[www.memkor.com](http://www.memkor.com)

A USA based supplier of high-performance cost-effective solid state flash drives for industrial, military and enterprise markets. Memkor provides some of the highest performing solid state storage devices (SSDs) in the industry designed to meet the demands of today's industrial and defense markets.

Multiple product families exist ranging from an 8 GByte 40 MByte/second transfer rate Compact Flash (CF) module with secure erase and purge, to a high-end 200 MByte/second transfer rate 256 GByte SATA flash drive also with secure erase. Products are rugged and support extreme temperature ranges (-40 degrees C to +85 degrees C operating).

### **Impact Case & Container**

[www.icc-case.com](http://www.icc-case.com)

Innovative aluminum transit & storage cases fully customizable with foam inserts, that provide the lightest and strongest construction available in a variety of sizes to include 19-inch rack configurations. Built to with stand maximum shock and vibration.

### **Sundance Multiprocessor Technology**

[www.sundance.com](http://www.sundance.com)

Designs and manufactures high-performance digital Signal Processing (DSP) and Xilinx-based FPGA hybrid hardware platforms. Modular hardware and software systems are easily reconfigured in support of high-speed I/O and signal processing test & measurement applications. These products facilitate rapid prototyping and the development of embedded systems.
