Southeast Technical Sales is your one-stop source for embedded computing solutions

ALPHI TECHNOLOGY CORPORATION www.alphitech.com
Industrial board level products featuring the latest technologies and a large selection of COTS I/O (cPCI, PMC, PCI, VME, I-P Modules) for Mil-Std-1553, Serial Communications, Data Acquisition & Control and Embedded Controllers.

AYDIN DISPLAYS, INC. www.aydindisplays.com
Flat Panel Displays (LCDs) specifically designed for the COTS military and industrial marketplace. These displays are designed to operate in extreme environmental conditions such as ground mobile, airborne, and ship board.

CHANDLER/MAY, INC. www.chandlermay.com
Large scale integrator and value-added reseller of VME, cPCI, and PC-based systems for commercial, industrial, and military/aerospace markets. Build-to-print, design, and turn-key system integration capabilities. Software services from drivers to complex software applications.

CORVALENT www.corvalent.com
Long-life motherboards and systems for embedded and industrial applications. Includes single board computers, peripheral devices, desktops, handheld devices, custom enclosures and rack-mounted systems designed for an eight to ten year production life.

ELECTRONICS INTEGRATION TECHNOLOGY www.eit-inc.com
Full-service contract manufacturer specializing in ruggedized COTS and MIL-Spec electronics assembly. The company excels in delivering high mix small to medium production runs, with fast and accurate prototyping.

EXCALIBUR SYSTEMS www.mil-1553.com
Products provide support for MIL-STD-1553, ARINC-429 and other military and commercial avionics specifications. A leader in providing the Aerospace Industry with high quality, cost effective data bus interfaces, bus converters, data recorders, couplers, cables, connectors and Integrated Solutions.

GENERAL MICRO SYSTEMS www.gms4sbc.com
High-performance Intel and PPC-based SBC's for embedded Real-Time markets. VME, VXS, CompactPCI, and custom form factors. PMC processor, communication, multimedia, and storage products. Products come in standard temperature, extended temperature, and full MIL versions.

IMPACT CASE & CONTAINER www.icc-case.com
Aluminum transit cases, fully customizable, that provide the lightest and strongest construction available in a universal 19 inch electronics rack. Built to withstand maximum shock and vibration. Also provides storage cases of all sizes with custom foam inserts.

MEMKOR, INC. www.memkor.com
US based supplier of Solid State Flash Drives for Industrial, Military and Enterprise markets. Memkor drives are designed for demanding industrial and defense applications, and provide some of the highest performing SSDs in the industry.

MID-EASTERN INDUSTRIES www.mideastind.com
Laboratory-programmable and non-programmable power supplies for military and commercial markets. High-precision, low-noise power sources.

NOVA ELECTRIC www.novaelectric.com
Ruggedized AC power sources for harsh environments and military applications. Pure Sine Wave DC-AC inverters, True On-Line UPS Systems, and Solid State Frequency Converters in the 120 VA to 320+ KVA single-and three-phase power range.

NOVA INTEGRATION SOLUTIONS www.novaintegration.com
Focus on rugged chassis and rugged printers. This includes conduction, convection and liquid cooled ATR chassis (VME, CompactPCI, VITA-xx), and COTS style rugged chassis. The rugged printer portfolio features monochrome; laser; color laser; and impact printers.

PERFORMANCE TECHNOLOGIES www.pt.com
Performance Technologies develops standards-based solutions for telecommunications, aerospace and defense, as well as commercial markets. The company's portfolio includes tightly integrated application-ready platforms for MicroTCA and CompactPCI, comprehensive blade offerings, and NexusWare (an integrated Linux OS, development environment, and communication protocols).

SIE COMPUTING SOLUTIONS www.sie-cs.com
An industry leader in engineering, design and manufacturing of convection and conduction cooled enclosures to include VME, VXS, VPX, cPCI, AdvancedTCA and MicroTCA chassis. Rugged and Mil Spec ATR solutions (COTS & Custom) are provided in support of weight limitations and severe environments. Solutions incorporate high shock & vibration designs, thermal management and TEMPEST isolation.

SUNDANCE MULTIPROCESSOR TECHNOLOGY www.sundance.com
Designs and manufactures high-performance DSP and FPGA hybrid hardware platforms. Modular hardware and software systems are easy to reconfigure to suit all high-speed I/O and signal processing applications, enabling the rapid prototyping and development of embedded systems.

SYSTEL www.systemusa.com
A leader in ruggedized design and system integration of Industrial, Military and Telecommunication computers and displays. Products include rackmount, wall-mount, panel-mount, and shoebox style computers, and rugged peripherals.

TECHNOLOGY DYNAMICS, INC. www.technologydynamicsinc.com
Standard and custom power supplies for commercial and military applications. AC/DC power supplies, DC-DC converters, Full Custom designs, and DC-UPS systems. Power levels range from a few watts to twenty thousand watts in both single and multiple output configurations.

TRIPLE E CORPORATION www.tripleease.com
Provides a complete line of electronic packaging solutions including front panels, metal front panel handles, extruded aluminum card guide assemblies, rugged card cages, backplanes, power supplies, and enclosures for VME, VME64x, VXS, VSI, PXI, Advanced TCA, and cPCI systems.
